

Proactive Project Delivery

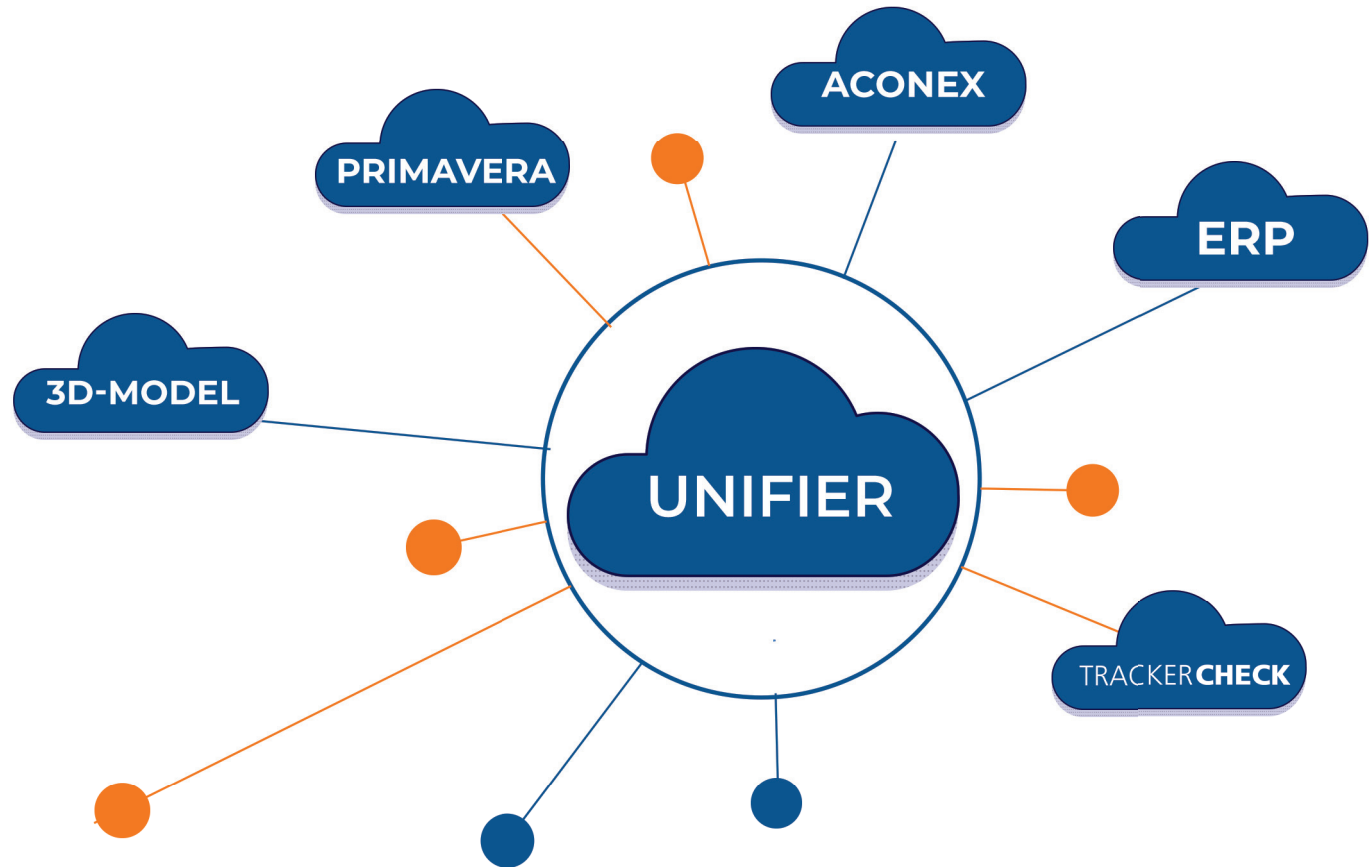

*From Concept to Completion: A Delivery
Tool for the Final Mile of Your Project*

At Tracker Technologies, our mission is to break down barriers in project delivery by uniting data, teams, and processes to deliver successful projects. TrackerCheck completes the digital backbone of Oracle's Construction Intelligence Cloud and closes out the final mile of project delivery. Natively integrated with Unifier, TrackerCheck empowers teams with boots-on-the-ground commissioning and readiness progress tracking and management, unlocking proactive project planning and AI analytics for the critical final mile of any project, regardless of its size or scope. You are now empowered to build faster, smarter, and safer than you ever thought possible.

TrackerCheck + Oracle

TrackerCheck's expertise in commissioning natively integrates with Oracle's proven enterprise project solutions, removing the traditional barriers of legacy software for true collaboration and clarity. The end result is a unified project delivery platform unlike any other.

- Real time field progressing seamlessly integrated with scheduling, procurement, work packages, and more
- Built on Oracle to leverage the horsepower of Oracle AI and analytics

Why It Matters

Elevate Safety:

Clear communication across all stakeholders

Proactive Intelligence:

Deal with issues before they become delays

Accelerated Completion:

Adapt to changes in real time with native connectivity to engineering, procurement, and construction data
